Appeal to  
chief administrative officer.

This is a GRAMA request made by Roger Bryner,

The request is made to CIO / Executive Director, Department  
of Technology Services, State of Utah, Mike Hussey  
801-538-3298 mhussey@utah.gov  
4501 Constitution Blvd, Salt Lake City, UT 84129

Ground 1: I already did request these records from the  
Health Department, they blame you for a false and inflated  
estimate of 20 hours to retrieve my data only, when the  
simple SQL string for both a full year and for my data are  
less than 15 minutes. It follows that if they requested an  
estimate for the work from you, you have records of which  
you are the unquestioned custodian responsive to the first  
part of this request. I simply disagree that  
interdepartmental agreements, quotes, and service  
communication are not records of both you and the health  
department. Thus you must respond to and provide all of  
these records:

"Request b: I am requesting all design or specification

documents for the Department of Health relational databases which store blood alcohol levels obtained from GC testing, any billing documents between departments, and any other records which would tend to specify the type of database used and query capabilities on that database."

Additionally the SQL strings are yours, not the Health department.

Ground 2: Under GRAMA blame shifting is not allowed, except for auditors. Database administrators are not auditors. See UCA 63G-2-204(2). You are attempting to use 63G-2-204(3)(b)(iii) however there is a big problem, you in fact maintain the database. Additionally under UCA 63G-2-204(2)(a) you are in fact the "governmental entity that prepares, owns, or retains the record." As you "own" the servers, you retain the data on them.

Ground 3: There is only 1 defendant, the state of Utah. Allowing the department of technical services and the department of health to blame shift, sandbag completely stupid and excessive 20 hour "technical service" estimates for getting my OWN MEDICAL RECORDS is a violation of the constitution of the State of Utah and the United States of America. Give me my records. Stop lying about the database. Be responsible and open government, not lying dishonest government officials who belong in the soviet union.

In summary, give me everything I asked for, most especially my own data, now.

Mr. Bryner,  
The State of Utah Department of  
Technology Services (DTS) has denied your GRAMA request  
dated March 22, 2016  
for the following information:

All design or  
specification documents for the Department of Health  
relational databases which  
store blood alcohol levels obtained from GC testing,  
any  
billing documents  
between departments, and any other records which would  
tend  
to specify the type
